

Contract Extension

We are delighted to confirm that the Scottish Ministers have approved a formal extension to our contract from 31st March 2011 until 31st May 2012 (a 14 month extension). This is fantastic news for us and gives us certainty of our current service provision.

Our Contract Director Norrie Westbrook said;

‘This decision reflects the level of ownership, dedication and hard work that our staff has demonstrated to date and we now look forward to continuing our delivery of an excellent service and preparing for the 4G round of contracts. ‘

Jim Barton, Transport Scotland’s Chief Road Engineer and Director said:

‘Extending these contracts builds on the benefits already delivered including excellent value for money and efficiency savings on the previous contracts, for the public purse’.
