

Course summary:

A course for installers who are required to hold a certificate of competence. Those who have successfully completed the basic module course need only complete the two day course.

Please note: LANTRA will not issue a qualification card for VRS courses unless the candidate holds a current FISS/CSCS joint scheme card.

Description:

Delegates will be assessed throughout the course for both technical knowledge and practical work, involving the erection of wire rope safety fences. A certificate will be issued to those who demonstrate competence.

Course objectives:

On completion of the training delegates should be aware of the following

- The concept of Quality Assurance and the certificate of approved erectors
- The concept of wire rope safety fences
- The importance of erecting wire rope safety fence to specifications and instructions
- The method of constructing anchor blocks

Delegates should also be able to

- Read & understand wire rope safety fence drawings
- Understand the principles of safety fences
- Carry out all operations in a safe and efficient manner
- Recognise components and obvious defects
- Handle, off-load and stack materials correctly and safely
- Tension wire rope safety fence
- Identify commonly made errors in the assembly and installation processes

Course Delivery: Classroom & Practical Work

Practical Work: Full PPE required, including waterproof clothing, safety boots, gloves and safety specs.

Language: English

Duration: 2 Days

Max number of learners: 6
