

Course summary:

The SSSTS (Site Supervisor's Safety Training Scheme) is a two-day site safety training course. Designed for those who are about to take on, or already have, supervisory responsibilities, it's an ideal foundation for junior managers wanting to develop a basic understanding of their health and safety duties and responsibilities in construction work.

Who should attend:

This course is ideal for anyone in a supervisory role, or if you are looking to move into a supervisory role in the future:

- Team leaders
- Foremen
- Gangers
- First line managers

Description:

This course covers a wide range of key areas, such as:

- The occupational health problems within the construction industry, and how site supervisors can address them
- How health and safety law is structured
- How to properly carry out risk assessments, and understanding the need for method statements
- How to carry out effective site inductions, toolbox talks and method statement briefings
- The importance of both proactive and reactive monitoring
- How to intervene in a timely manner when bad practice is identified

Course objectives:

On successful completion of the SSSTS training course delegates that are given supervisory responsibilities will understand:

- why they are carrying out their identified duties
- what is expected of them
- ensure they contribute to the safety of the workplace

Course Delivery: Classroom

Language: English

Duration: 2 Days

Max number of learners: 20
