

Course summary:

This course is for inspectors or installers who must be registered in accordance with the requirements of National Highways Sector Scheme 2B

Please note: LANTRA will not issue a qualification card for VRS courses unless the candidate holds a current FISS/CSCS joint scheme card.

Description:

Delegates will be assessed throughout the course for both knowledge and practical work. There will be an open-book, written test at the end of the course

Course objectives:

On completion of the training, delegates should be aware of the following

- The concept of Quality Assurance and the certification of approved installers
- The difference between proprietary and non-proprietary systems
- The classification of barrier systems and terminals
- The correct use of the products
- The importance of erecting the products in accordance with instructions and specifications
- The need for testing posts for stability
- The need to ensure that only the manufacturer's products are used in proprietary systems
- The need to segregate components

Delegates should also be able to

- Read and understand the drawings
- Understand the principles of the vehicle restraint systems
- Carry out all installation operations in a safe and efficient manner
- Recognise components and obvious defects
- Understand the obligations involved when using proprietary systems

Course Delivery: Classroom & Practical Work

Practical Work: Full PPE required, including waterproof clothing, safety boots, gloves and safety specs.

Language: English

Duration: 2 Days

Max number of learners: 6
